

The Daily Courant.

Saturday, February 11. 1716.

From the Paris Gazette, dated Feb. 13.

Naples, January 11.

THE Ships that are to transport the Regiments of Venzel and Caraffa to the Coasts of the Adriatick Sea subject the House of Austria being ready to sail, have received Orders from the Viceroy to suspend their departure till further Advice. Cardinal Acciaoli, Bishop of Aversa, is arrived here from his Ambassy, and after the reciprocal Visits between him and the Viceroy, upon which several Points of Ceremony were to be regulated, he departed for Rome. A new Dispute is risen between Cardinal Fagnanelli Archbishop of Naples and the Viceroy, upon Occasion of the Entry of the Marchioness of Gioia Daughter of the Prince de Valla Ficalomani into a Monastery of the Nuns of St. Sebastian, without permission of the Cardinal, and even after he had refused it. The Countess of Bary have not appeared for some time, but we are daily uneasy upon Account of those of Delcigno, who are labouring to augment considerably their Gallies.

Rome, Jan. 21. On the 13th of this Month the Pope held a Consistory, where after the proposing and granting several Bishopricks and other Benefices, he gave the Pallium to the Bishop of Catania, and made him the Title of Patriarch of Constantinople to the Bishop of Catania. He afterwards made a Discourse to the Cardinals, wherein he represented to them with much Zeal, the dangerous State wherein Christendom, and principally Italy, is at present, from the powerful Armament of the Turks. He told them afterwards, that on such Occasions recourse ought to be had to the Mercy of God, and his Assistance to be implored, and to that purpose he granted a plenary Indulgence to all those who should visit St. Peter's Church the 18th, on which Day the Festival of St. Peter's Chair at Rome is celebrated; and lastly, he exhorted the Cardinals to furnish according to their several Revenues such Sums as they think proper towards the Expence of the Armament which he has resolved to make for the Defence of Christendom and the Ecclesiastical State. Whereupon Cardinal Acciaoli has given 1000 Crowns, the Cardinals Marescotti and Scotti 2000, Cardinal Albani 3000, the Cardinals Paracciani, Olivieri, and Caraccioli, each 500, and some others have contributed or promised to contribute several Sums, and it is hoped that several Prelates and other considerable Persons of the Court will do the same. The Cardinal Albani, as Prefect of the Fabrick of St. Peter's, has received Orders to cause the Sums that are in the Hands of the Depositary of the Fabrick of St. Peter, to the Sum of 200000 Crowns, to be remitted into the Hands of the Sieur Montioni, to be employed according to the Commands of the Treasurer of the Chamber, the Pope reserving to himself the providing for the Reimbursement of that Money. He gave Orders to all the Churches and Communities Secular and Regular, to go in Procession to St. Peter's Church in the Manner they went in the Year of the Earthquake, which was accordingly performed on the 18th, and he went thither himself

that Day, and celebrated Mass. On the 17th Count Gallach, the Emperor's Ambassador, had a long Audience of the Pope, wherein he spoke to him of the Means of opposing the Progress of the Infidels, and the Resolutions taken upon that Subject in several Congregations. His Holiness designing to facilitate to his Imperial Majesty the Defence of Christendom, has agreed to the raising of the Tenths of all Ecclesiastical Revenues Secular and Regular in Austria and all the Hereditary Countries. Afterwards the Venetian Ambassador had Audience, and he proposed to the Pope the Means of putting the Island and Forts of Corfu into a State of Security, communicating to him the Resolutions the Senate have taken for sending thither a great Body of Troops. 'Tis assured, the King of Portugal has promised six great Ships of War, which will set out in March, to come to joyn those the Pope has resolved to Arm and send to reinforce the Venetian Fleet. The Ambassador of that Crown has dispatched a Courier to Lisbon since his Audience. 'Tis hoped also that the Bishop of Munster will give 3000 Foot and 1000 Horse for the Defence of the Coasts of the State of the Church. The Chevalier Morosini is arrived, having passed by Florence, and has it in charge to give an Account to the Pope of the Progress for the next Campaign.

London, February 11.

Yesterday arriv'd the Mails that were wanting from Holland.

From the Amst. Courant, dated Feb. 11.

Vienna, Feb. 1. 'Tis advised from Hungary, that the Troops there are impatient for the Arrears of their Pay, and that some Soldiers have deserted. The same Advices add, that not only Ragotski, but also Berezeni lie near the Borders of that Kingdom, ready to play their old Game whenever the War is begun between the Emperor and the Turks. Here are Letters from General Schuylenburg which intimate, that understanding that the Island of Corfu is in very ill State of Defence, he was going thither to visit it, and give the necessary Orders; and whilal, that if the Venetians do not make more and better Provision for the War than yet appears, he should lay down his Commission, and return to Germany. Our Court is very much concern'd, by reason that an Express that was carrying Letters of great Importance to Prince Philip of Darmstadt, Governor of Mantua, was set upon by six sturdy Fellows, who took the Paquet from him; and we are not without Apprehensions that some Ministers of the Court of Savoy may have employ'd them, the rather since we have Advice that the Duke of Savoy makes a great Preparations for War as if he were unavoidably obliged to it; and has written to the French Court, that he, apprehending the Emperor will fall upon him, hopes France will give him Assistance. In the mean time another Express is sent with the Letters to Mantua.

From the Leiden Gazette, dated Feb. 11.

Hamburg, Feb. 4. After a great Snow which fell on the 31st, the Wind came about to the South West, and made a Thaw, which continues; and by the melting of the great Quantity of Snow that has fallen during the Frost, has made the Streets of this City almost unpassable; but the Ice was so thick, that it will be a Fortnight before

fore the Elbe will be open. Our last Letters from Copenhagen say, that the Sound was cleared of Ice by the strong South West Wind that blow'd, except the Passage between Schonen and the Island Ween. The Swedes are labouring to encrease their Army, by forcing all young Men into their Service; but many retire secretly elsewhere to avoid it.

From the Amst. Courant, dated Feb. 11.
Hamburgh, Feb. 4. 'Tis written from Copenhagen, that during the Frost a great Council was held for three Days together, wherein the King's Privy Council, the Admirals, the President of the City, and the Intendant of the Policy assisted, and it was there resolved to cause all the Corn and Hay to be brought out of the Country to Copenhagen, and lay it up there in Magazines, to prevent the Enemy, in case of an Invasion, seizing it, and all Waggon and Boats were forbid to Travel: But the Ice being by the South Wind carried out of the Sound and elsewhere loosened, and so thrown in Heaps, that 'tis impossible to come over, the fear of the Enemy is sufficiently vanished, and the Inhabitants of the Country who had fled to the City are now returning home again. According to some Advices, the King of Sweden is gone to old Sweden, to provide against an Invasion of the Russians; but this wants Confirmation. It is believed the Swedes will above all things endeavour to bring their Fleet into a better State, in order to make a great Transport to Wismar, the Blockade whereof will be speedily reinforced by 3 Battallions, namely, 2 Danish, 2 Prussian, and 1 Hanoverian. We hear that the Swedish General Demius who commanded at Staelsund is got into Wismar. The Danes give out that a Body of 10000 Men, under the Command of Lieutenant General van Eynten, were to be at Odensee in the Island of Funen as Yesterday, to be employed in some notable Expedition.

London, February 11.

Yesterday South-Sea Stock was 94 three quarters to 94 seven eights Bank 127 three quarters to 128. India 134 to 134 one quarter. African 17.
